

Unlimited high-quality training for your entire campus

What is lynda.com?

lynda.com is an online subscription library that teaches the latest software tools and skills through high-quality instructional videos taught by recognized industry experts.

What is lyndaCampus?

lyndaCampus provides unrestricted web-based access to the entire lynda.com library of instructional videos. Implementation of lyndaCampus is a simple setup that allows you to integrate with your existing school portal or IP network. It includes the ability for your faculty, staff, and students to create personal profiles and queues and access bookmarking and certificate of completion features.

What do you get?

- Unlimited access to courses on a wide variety of technology and disciplines
- Up-to-date content revised more often than books and manuals
- New courses added every week at no additional cost
- Access to instructors' exercise files
- Closed captioning and searchable, timecoded transcripts

What are the benefits?

- High-quality training at low cost
- Employees and students keep their skills current and learn new skills
- Better learning through rich media video
- Short, concise videos are easy to search, easy to understand
- Training from beginner to advanced
- Anytime, anywhere learning—on desktops, tablets, and smartphones

How do we work with your school?

- Integration with your existing school portal or IP network
- Shibboleth and CAS support
- Cloud solution—no downloaded content
- Web delivery works on all platforms—Mac, Windows, and Linux
- Mobile access with mobile site and iPad/iPhone app

Metrics and reporting

- Summarizes usage details for your entire organization and individual users
- Tracks which courses get the most views from the users
- Shows how often users access lynda.com and what they're viewing
- Lists courses completed by users and their certificates of completion
- Provides stats for each user's operating system, browser, media player, and IP address

"Technology is transforming research. Having access to lynda.com has helped students engage in real-world digital research projects." —Michael Page, Emory University

 Apple
 Autodesk
 Avid
 Blackboard
 Facebook
 Google
 IBM SPSS
 Open Source
 Microsoft
 Twitter
 And more

Who is it for?

Students—Supports presentation and research skills, and adjusts to diverse learning styles and levels. Empowers ability to research projects and do independent study.

Faculty— Acts like a virtual teaching assistant that frees educators to teach theory and concepts, and gives the opportunity to encourage critical thinking instead of teaching tools and skills.

Staff—Helps keep up to date with technology through access to just-in-time learning.

HR—Provides professional development as a value-added employee benefit.

IT and IS Help Desk— Provides a cost-effective solution, requiring less administration while answering questions more quickly.
